JANUARY–FEBRUARY / JANVIER–FÉVRIER

ARTICLES

C. C. Silliman, B. S. Beckman, and James R. Jeter, Jr. Changes in protein kinase activity within 30 min of induced differentiation in Friend erythroleukemia cells 1

Josée Guillemette, Michel Marion, Francine Denizeau, Michel Fournier, and Pauline Brousseau Characterization of the *in vitro* hepatocyte model for toxicological evaluation: repeated growth stimulation and glutathione response 7

Jia He and Peter Nicholls Dibucaine interacts differently with membrane and protein in cytochrome *c* oxidase systems 14

Pratima Dutta and Gopal C. Majumder Purification and characterization of rat epididymal neutral β-galactosidase and its changes during *in vivo* development 22

Christine Haskin and Ivan Cameron Physiological levels of hydrostatic pressure alter morphology and organization of cytoskeletal and adhesion proteins in MG-63 osteosarcoma cells 27

Hassan Salari, Mervin Low, Sandra Howard, Glenn Edin, and Robert Bittman 1-*O*-Hexadecyl-2-*O*-methyl-*sn*-glycero-3-phosphocholine inhibits diacylglycerol kinase in WEHI-3B cells 36

Robert L. Carlone, Robert P. Boulianne, K. Marion Vijh, Heather Karn, and Gordon A. D. Fraser Retinoic acid stimulates the synthesis of a novel heat shock protein in the regenerating forelimb of the newt 43

Dev Mangroo and Gerhard E. Gerber Fatty acid uptake in *Escherichia coli*: regulation by recruitment of fatty acyl-CoA synthetase to the plasma membrane 51

Isabelle Daigle, Monique Gilbert, and François Boucher Halogenated general anesthetics in visual photoreceptor membranes as examined by static and dynamic properties of rhodopsin 57

Charles Lee Kuckel, Peter K. Lambooy, and Patricia N. Farnsworth Modulation of actin polymerization by an exogenous protein, lysozyme 65

Timothy W. Blaker, Michael Locke, and Burr G. Atkinson Are prosome particles formed by the disintegration of proteasomes? 73

NOTES

Carole Danis and Guy Lemay Protein synthesis in different cell lines infected with orthoreovirus serotype 3: inhibition of host-cell protein synthesis correlates with accelerated viral multiplication and cell killing 81

Jean Labrecque, Pangala V. Bhat, and André Lacroix Purification and partial characterization of a rat kidney aldehyde dehydrogenase that oxidizes retinal to retinoic acid 85

Agnes W. H. Tan and Frank Q. Nuttall *In vivo* phosphorylation of liver glycogen synthase. Effect of glucose and glucagon treatment of liver cells on the distribution of the [^{32}P]phosphate 90

Donald C. Wigfield and Douglas M. Goltz Activation parameters for the reconstitution of apotyrosinase by copper 96

Daniel J. Sexton, Jonathan R. Dimmock, and Bulent Mutus A spectrophotometric glutathione *S*-transferase assay displaying alpha-class selectivity utilizing 1-*p*-chlorophenyl-4,4-dimethyl-5-diethylamino-1-penten-3-one hydrobromide 98

Ying Lu, Leda Raptis, Steve Anderson, Michael J. Corbley, Yu-Chun Zhou, Hugh Pross, and Tina Haliotis Erratum: Ras modulates commitment and maturation of 10T$^1/_2$ fibroblasts to adipocytes 102

Instructions to Authors vii

MARCH–APRIL / MARS–AVRIL

REVIEW / SYNTHÈSE

Arnold Stern, Xuefeng Yin, Siu-Sing Tsang, Allan Davison, and Jim Moon Vanadium as a modulator of cellular regulatory cascades and oncogene expression 103

ARTICLE

Ann M. Bode, James D. Foster, and Robert C. Nordlie Inhibition of glucose-6-phosphate phosphohydrolase by 3-mercaptopicolinate and two analogs is metabolically directive 113

Xiaoli Lu, Xi Zhou, Dawn Kardash, and Gilbert Arthur Metabolism of alkyl lysophospholipid in epithelial cancer cell lines and inhibition of cell growth 122

Mark Ring and Reuben E. Huber The properties of β-galactosidases (*Escherichia coli*) with halogenated tyrosines 127

Hing Man Chan and M. George Cherian Ontogenic changes in hepatic metallothionein isoforms in prenatal and newborn rats 133

Vis A. Liepkalns, John J. Myher, Arnis Kuksis, Ubaldo Leli, Nathalie Freysz, and George Hauser Molecular species of glycerophospholipids and diacylglycerols of cultured SH-SY5Y human neuroblastoma cells 141

Alison L. Symington, Selma Zimmerman, and A. M. Zimmerman The influence of hydrostatic pressure on the distribution of histone mRNA in HeLa cells 150

Yutaka Oiso, Jun Kotoyori, Takashi Murase, Yoshiaki Ito, and Osamu Kozawa Effect of pituitary adenylate cyclase activating polypeptide on vasopressin-induced proliferation of aortic smooth muscle cells: comparison with vasoactive intestinal polypeptide 156

Jeremy S. Lee, Laura J. P. Latimer, and R. Stephen Reid A cooperative conformational change in duplex DNA induced by Zn^{2+} and other divalent metal ions 162

Sylvain Robert and Pierre Tancrède The electrical and spectroscopic properties of planar asymmetrical membranes incorporating chlorophyll *a* and plastoquinone-9. Influence of surface charges on electron transfer 169

Michel Desjardins and David Morse The polypeptide components of scintillons, the bioluminescence organelles of the dinoflagellate *Gonyaulax polyedra* 176

Amy Y. P. Mok, Gordon E. McDougall, and William C. McMurray Comparative studies of CDP-diacylglycerol synthase in rat liver mitochondria and microsomes 183

Ken J. Hampel and Jeremy S. Lee Two-dimensional pulsed-field gel electrophoresis of yeast chromosomes: evidence for triplex-mediated DNA condensation 190

Gopal Thinakaran and Jnanankur Bag Regulation of *c-jun*/AP-1 expression in rat L6 myoblasts 197

M. Kapoor, Y. Vijayaraghavan, R. Kadonaga, and K. E. A. LaRue NAD^+-specific glutamate dehydrogenase of *Neurospora crassa*: cloning, complete nucleotide sequence, and gene mapping 205

NOTES

Phillip W. Albro, Jean T. Corbett, and Joanna L. Schroeder Endogenous lipids of the earthworm *Lumbricus terrestris* 220

B. Barbara Czaban, Arthur Forer, and Dwayne A. Wise Microinjection into crane-fly spermatocytes 222

MAY–JUNE / MAI–JUIN

ARTICLES

Ceredwyn E. Hill and David O. Ajikobi Inhibition of α-adrenergic responses in the rat liver by lipophilic K^+ channel blockers or depolarizing Cl^- gradients. Evidence for a potential-sensitive step in the signal transduction path 229

Paul Ala, Pele Chong, Vettai S. Ananthanarayanan, Neville Chan, and Daniel S.C. Yang Synthesis and characterization of a fragment of an ice nucleation protein 236

B. Geetha Devi, C.M. Habeebullah, and P.D. Gupta Ontogeny of hepatocyte proliferation inhibitor activity during human liver development and its effect on cell proliferation in *in vivo* and *in vitro* studies 241

Patricia G. Murphy, Steven P. Lenz, Mark Dobson, Allan D. Arndt, and David A. Hart Purification and characterization of the plasminogen activator inhibitors PAI-1, PAI-2, and PN-1 from the human glioblastoma U138 248

Jeffrey Y. Su and Kenneth B. Storey Substrate- and effector-induced conformational changes in phosphofructokinase from white muscle of rainbow trout (*Oncorhynchus mykiss*): a fluorescence study 255

Gopal Thinakaran and Jnanankur Bag Expression of the protooncogene c-*jun* is maintained during myogenic differentiation in rat L6 myoblasts 260

Anna T. Grazul-Bilska, Dale A. Redmer, S. Derek Killilea, Jing Zheng, and Lawrence P. Reynolds Initial characterization of endothelial mitogens produced by bovine corpora lutea from the estrous cycle 270

Xiao-Feng Yang, Pierre Emmanuel Milhiet, Florence Gaudoux, Philippe Crine, and Guy Boileau Complete sequence of rabbit kidney aminopeptidase N and mRNA localization in rabbit kidney by *in situ* hybridization 278

Anu Mathew, Mira Grdisa, and R.M. Johnstone Nucleosides and glutamine are primary energy substrates for embryonic and adult chicken red cells 288

Hakima Amri, Jean-Luc Gaillard, Ihsan Al-Timimi, and Pierre Silberzahn Equine ovarian aromatase: evidence for a species specificity 296

NOTES

L. Bharathi, K.B. Shenoy, M. Mojamdar, and S.N. Hegde *In vitro* growth-stimulatory property of pigeon milk 303

Hossein Mehrani and Kenneth B. Storey Purification and molecular properties of glycogen phosphorylase *b* from trout white muscle 308

Christine Haskin, Ivan Cameron, and Kyriacos Athanasiou Erratum: Physiological levels of hydrostatic pressure alter morphology and organization of cytoskeletal and adhesion proteins in MG-63 osteosarcoma cells 313

JULY–AUGUST / JUILLET–AOÛT

ARTICLES

Wendy Y. Precious and John Barrett Quantification of the control of carbohydrate catabolism in the tapeworm *Hymenolepis diminuta* 315

Mohamed Sidi Mammar, Xavier Vignon, Edmond Rock, Frederique Mathieu, and Gilles Gandemer Analysis of lipid composition of sarcoplasmic reticulum membranes from normal and malignant hyperthermic pig skeletal muscle 324

Lisa A. Marshall and Amy Roshak Coexistence of two biochemically distinct phospholipase A_2 activities in human platelet, monocyte, and neutrophil 331

Carmelina Sagherian, Stephen Poroszlay, George Vavougios, and Don Mahuran Proteolytic processing of the proβ chain of β-hexosaminidase occurs at basic residues contained within an exposed disulfide loop structure 340

Xin-Yi Shen and Aubie Angel Identification of high density lipoprotein binding proteins in mature adipocyte plasma membranes 348

Kedar N. Prasad, Erika Carvalho, Sanjay Kumar, Judith Edwards-Prasad, and Francisco G. La Rosa Relationship between adenosine 3′,5′-cyclic monophosphate level, cell proliferation, and α-amylase in rat parotid 355

Christine L. Haskin, Kyriacos A. Athanasiou, Robert Klebe, and Ivan L. Cameron A heat-shock-like response with cytoskeletal disruption occurs following hydrostatic pressure in MG-63 osteosarcoma cells 361

Gin Wu, Shiawhwa Su, Tzyy-Yun Tzeng Kung, and R. Curtis Bird Molecular cloning of G1 phase mRNAs from a subtractive G1 phase cDNA library 372

Paul L.J. Matthews, Eileen Bartlett, V.S. Ananthanarayanan, and Kevin M.W. Keough Reconstitution of rabbit sarcoplasmic reticulum calcium ATPase in a series of phosphatidylcholines containing a saturated and an unsaturated chain: suggestion of an optimal lipid environment 381

Josette Noël, Angelica Fleser, François Bellemare, Georges Thiéry, Raynald Laprade, Gerhard Burckhardt, and Patrick Vinay Effect of cholate on H^+-ATPase and other proteins of dog renal brush-border membrane 390

Yoshinori Tsuchiya, Hirofumi Fujisawa, Ken-Ichi Nakayama, Hitoshi Nagahora, and Yoshifumi Jigami Effect of chicken lysozyme signal peptide alterations on secretion of human lysozyme in *Saccharomyces cerevisiae* 401

NOTES

Les Jones, Sharon Churchill, and Perry Churchill Purification and characterization of D-β-hydroxybutyrate dehydrogenase expressed in *Escherichia coli* 406

Haruo Homareda, Kitoshi Kawakami, Kei Nagano, and Hideo Matsui Stabilization in microsomal membranes of the fifth transmembrane segment of the Na^+,K^+-ATPase α subunit with proline to leucine mutation 410

SEPTEMBER–OCTOBER / SEPTEMBRE–OCTOBRE

ARTICLES

Linda M. Beynon and Malcolm B. Perry Structure of the lipopolysaccharide O-antigen of *Pseudomonas cepacia* serotype A 417

Loola S. Al-Kassim and C. Stan Tsai Purification and kinetic characterization of pickerel liver alcohol dehydrogenase with dual coenzyme specificity 421

C. Stan Tsai and Loola S. Al-Kassim Multifunctional activities of pickerel liver alcohol dehydrogenase 427

Jon M. Gerrard, Pauline Robinson, Michael Narvey, and Archibald McNicol Increased phosphatidic acid and decreased lysophosphatidic acid in response to thrombin is associated with inhibition of platelet aggregation 432

Isabella DalleDonne, Aldo Milzani, Umberto Fascio, Antonia Ratti, and Roberto Colombo Lithium preserves F-actin from the disarrangement induced by either DNase I or cytochalasin D 440

Chiaki W. Nakagawa, Norihiro Mutoh, and Yukimasa Hayashi Glutathione synthetase from the fission yeast. Purification and its unique heteromeric subunit structure 447

Sachdev S. Sidhu, Gabriel B. Kalmar, and Thor J. Borgford Characterization of the gene encoding the glutamic-acid-specific protease of *Streptomyces griseus* 454

Fermín Pacheco, Ricardo Mejía, and Marta S. Fernández Calcium ions reverse a latency period induced by bovine serum albumin in the time course of phospholipase A_2 action on 1,2-dipalmitoyl-*sn*-glycero-3-phosphocholine liposomes 462

Harkirat S. Sidhu, Stella A.R. Rastogi, David M. Byers, Duane L. Guernsey, Harold W. Cook, Frederick B.St.C. Palmer, and Matthew W. Spence Regulation of low density lipoprotein receptor and 3-hydroxy-3-methyl-glutaryl-CoA reductase activities are differentially affected in Niemann-Pick type C and type D fibroblasts 467

Nathalie Chaly and Xia Chen Assembly of adenovirus-specific nuclear inclusions in lytically infected HeLa cells: an ultrastructural and cytochemical study 475

Valerie M. Weaver, Boleslaw Lach, P. Roy Walker, and Marianna Sikorska Role of proteolysis in apoptosis: involvement of serine proteases in internucleosomal DNA fragmentation in immature thymocytes 488

NOVEMBER–DECEMBER / NOVEMBRE–DÉCEMBRE

ARTICLES

Hossein Mehrani and Kenneth B. Storey Control of glycogenolysis and effects of exercise on phosphorylase kinase and cAMP-dependent protein kinase in rainbow trout organs **501**
